WE HAVE MASON BEES		Price
Mason Bee Cocoons	10 Cocoons, 4 Females and 6 Males	\$ 15.99
<p>When the temperatures are in the 50's and the fruit trees and shrubs are starting to bloom, it's time to put out Mason Bees and a shelter for them. They will reward you by pollinating your garden fruit plants.</p> <p>The orchard mason bee is a gentle beneficial insect that has potential as a pollinator of fruit plants. They are found through-out most of North America. If you want to develop a population to pollinate your fruit garden, you can place a nesting house in an area protected from wind and rain. Under an eave, on the warmest side of your house is preferable. Mount the house in March, before the bees begin nesting. Nesting is generally complete by mid-summer. Follow the instructions on the bee cocoon box on how to locate your bee cocoons safely in the garden.</p>		
WE HAVE BENEFICIAL NEMATODES		Price
1 Package contains 10 million active units		\$ 29.99
